

Project Initialization and Planning Phase

Date	27 June 2026
Team ID	XXXXXX
Project Name	Voice Based Concept Understanding Analyser
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement):

Problem Statement (PS)	I am (Customer)	I 'm trying to	But	Because	Which makes me feel
PS-1	Student / Learner	Explain my understanding of a concept through voice and receive an accurate evaluation.	Existing learning platforms mainly assess written answers and cannot effectively evaluate spoken conceptual understanding.	Most systems lack AI-based speech recognition and semantic analysis to compare spoken explanations with the expected concepts.	Uncertain about my conceptual understanding, communication skills, and interview readiness.

PS-2	Teacher / Faculty / Trainer	Evaluate students' conceptual understanding quickly and provide meaningful feedback.	Conducting oral assessments manually is time-consuming, inconsistent, and difficult for large classes.	There is no automated system that converts speech into text, analyzes concept similarity, and generates instant evaluation reports.	Overburdened with manual assessment and unable to provide personalized feedback efficiently.
